University**

Stip, N. Macedonia

Institution Description

- A state university, ranked on the **second place** from the list of state universities in the country.
- The University is founded on **27th of March 2007**.
- The seat of the University is in Stip, eastern part of the Republic of North Macedonia.
- The University integrates **12 faculties organized in 4 University campuses**.
- More than **100 study programs**.
- The studies are realized on the basis of accredited study programs, which are designed in accordance with **the credit – transfer system**.
- The University has teaching centers in **3 cities** of the Republic of North Macedonia.
- The University has over **500 employees**.
- Over **400 of them are part of the team of teachers**: professors and assistants at one of the faculties.

STUDY PROGRAMS

STUDY PROGRAMS IN MACEDONIAN

- More than 70 active study programs for the first cycle and integrated first and second cycle of studies.
- There are approximately 80 master's and professional specialist degree programs.
- There are 11 PhD accredited active programs and 15 programs are in the process of accreditation.

ENGLISH PROGRAMS

- General medicine at the Faculty of Medical Sciences – Integrated first and second cycle
- Master's program in Radio Pharmacy at the Faculty of Medical Sciences
- International Law and International Relations at the Faculty of Law – First cycle
- Jazz Guitar, Jazz Trumpet, Jazz saxophone, Jazz percussions and Jazz piano at the Music Academy – First cycle
- Contemporary dance performance at the Film Academy – First cycle
- Master's programs in Contemporary Dance Education and Contemporary Dance Choreography at the Film Academy

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Education and Culture Executive Agency [EACEA]. Neither the European Union nor the granting authority can be held responsible for them. Project 101177596.

PhD SCHOOL

- Goce Delcev University organises and conducts higher-education work for third cycle of studies through the PhD School. The realised study programmes are accredited and fully in accordance with the Bologna Declaration.
- The third cycle study programmes are divided into three broader scientific and research fields on three campuses, and these are the following:
 - Campus 2 for technical-technological sciences, biotechnical sciences and mathematical sciences
 - Campus 3 for medical sciences and
 - Campus 4 for social sciences and humanities

Research life

UDG ACADEMIC REPOSITORY

The University database provides a complete insight into university research results and theses. Most of the scientific works of our professors have been published in international journals in relevant databases of peer-reviewed research literature, such as EBSCO, Scopus, WoS and others. (<https://eprints.ugd.edu.mk/view/creators/>)

RESEARCH IS PROMOTED ACROSS THE
UNIVERSITY THROUGH TWO PRINCIPAL
MEASURES:

- Firstly, research activity is a key criterion for promotion, and

- Secondly, a university scientific fund is available for small research grants.

UGD E- LIBRARY:

<https://e-lib.ugd.edu.mk/naslovna.php>

In the period between 2015-2024, UGD published more than 1000 books and articles.

Active 11 international journals, indexed in relevant international databases of peer-reviewed research literature such as EBSCO, Scopus and others.

Laboratories

Dedicated to fostering scientific research and innovation through its extensive network of modern laboratories and research centers - not only enhance the academic development of students and staff but also offer valuable services to the broader scientific community and industry.

UNILAB

UNILAB

- UNILAB is a laboratory as part of the Faculty of Agricultural Sciences that functions as a separate unit and controls the safety and the quality of the available products by conducting a multi-element analysis of food and other additives, drinks, vegetative material and extracts, as well as suspensions and concentrates of active substances in the pharmacological products. The laboratory is self-financed by offering services to clients.

AMBICON

AMBICON.UGD

- The laboratory AMBICON as part of the Faculty of Natural and Technical Sciences has an equipment for control of the qualitative and quantitative parameters of the air and an analysis of the morphological and chemical content of the substances. The laboratory is one of the most well known laboratories that are accredited in accordance with the European standards by the Accreditation Institute of Republic of Macedonia. The laboratory also includes a **department of electronic microscopy**, a **department of the natural environment** and the **work environment**, and a **department for mineral technology**.

<https://ambiconlab.ugd.edu.mk/>

DROP

- The laboratory for digital resources and an open access DROP works on studying and following the latest scientific research in the field of digitalisation and the approach to online resources i.e. their storage, preservation and maintenance, a registration and indexing of these resources, their standardisation and the architecture of the repositories, as well as the application of the informatic systems related to the digital resources, repositories and libraries

Laboratory for Computer security and Digital Forensics

The Laboratory for Computer security and Digital Forensics is part of the Faculty of Computer Science. The Laboratory offers several different services:

- Security scanning of web applications and web sites
- Networks security scanning
- Cybersecurity training, secure programming training
- Recovering of deleted and lost data from different media
- Forensic analysis for civil and judicial needs, etc.

labsec.ugd.edu.mk

KIENON

- **The Laboratory for Quantitative Research in Economic and Organizational Sciences** at UGD (KIEON) is one of a series of laboratories within UGD which has an educational purpose for the students in all cycles of studies. The laboratory primarily carries out teaching and educational activities related to quantitative research in the study of economic areas and other social sciences that have similar needs. The laboratory also owns advances statistical software and modern hardware, which is used by the academic staff for research, as a team or individually or in cooperation with the students within their scientific projects or thesis. This laboratory is also open for cooperation and participation in mutual projects with external partners.

- **The Laboratory of Mechanical and Thermal Testing** at the Faculty of Mechanical Engineering is equipped with state-of-the-art testing equipment for evaluating material properties under various mechanical and thermal conditions. The lab is dedicated to research, teaching, and industrial applications in material characterization, structural testing, thermal effects on materials, and fatigue and fracture analysis.

Key Equipment:

1. Electromechanical Universal Testing - Tensile Testing, Compression Testing, 3-Point Bending Testing

2. Rotating Bending Fatigue Test Machine (Four-Point Bending) This machine is designed for fatigue testing of materials under cyclic loading- Four-Point Loading Configuration, High-Temperature Furnace (up to 300°C), Rotating Bending Mode

UGD MAKERSPACE

The laboratory is dedicated to **research, creation, and innovation**, where design, develop, and test ideas until achieve a prototype.

The laboratory is equipped with a CNC machine, a 3D printer, a 3D scanner, industrial glasses for AR/VR, thermal imaging cameras, weaving machines designed for smart textiles, as well as sensor equipment and kits.

The laboratory plays the role of a hub for youth networking and cooperation between the private sector, scientific and educational institutions, and civic associations—the only one of its kind in the central and eastern regions.

Other laboratories

Laboratories that successfully function in their own domains and offer a range of services as part of UGD are the following:

- Laboratory for food quality analysis

E – UGD

UGD educational platforms are designed for the students to be the ones who guide their own learning, being active actors in their education. Thanks to attractive content, interaction, and gamification; students are motivated, work autonomously, and focus on their self-learning.

E-learning methods and technology at UGD are important both for educating students and for the professional development of the teaching staff.

E-LEARNING CENTER

The eLearning Center assists the University community in exploiting the potential of technology to enhance teaching and learning. The center gives students the best of both worlds as they get to learn anywhere, anytime, and anyhow from some of the best and brightest in their fields, as our e-Learning courses are taught by the same renowned faculty members who teach in our on-campus programs.

E-LIBRARY

The E-Library at UGD is developed to store online resources and services in support of the present and future teaching and learning needs of the University. The databases contain journals, book reviews, e- books, newspapers and magazines, conference proceedings, etc. They are available free of charge for students and employees. The E-library contains a total of 974 free e-books (downloads 448,819 - 11.01.23)
<https://e-lib.ugd.edu.mk/naslovna.php>

E-INDEX

Through the e-index, complete electronic services are available, including:

- electronic semester registration,
- electronic semester verification,
- electronic registration of exams and project assignments,
- electronic payment,
- electronic results,
- electronic bulletin board,
- electronic communication and electronic consultation with the teaching and collaborative staff.
